Festschloss Hof

Private House

Ludwigsburg Castle

LambertsGlas **restauro**[®] is available in the following varieties:

restauro[®] Light 2 mm with subtle movement

and a translucent structure for glazing historical furniture and stylishly framing historical pictures.

restauro[®] Light 3 mm with subtle movement

for window glazing, as well as double glazing with a total thickness of just 10 mm.

restauro[®] Classic 3 mm with pronounced movement

The authentic looking glass for traditional windows.

restauro[®] Waldglas

with a greenish hue, based on the Potash glass of medieval glass factories.

restauro[®] Extra

is a variant of the previously mentioned glasses with a specially manufactured, stronger structure.

Production

The manufacturing of **LambertsGlas restauro**[®] takes place through traditional craftwork, which dates back hundreds of years, and is a complex procedure. Gaffers form the viscous glass from the red-hot glass melt with blowpipes into cylinders, which are later stretched into glass panes. Each glass pane is checked by quality control and approved for delivery.
